IBM Cloud
Quick Reference Guide

Architect for IBM Cloud Satellite

Overview
Architect for IBM Cloud Satellite provides professional services to start your path to leveraging IBM Cloud services and the IBM Cloud Satellite Connector in any location, whether in your data center, the edge or in other clouds. Let IBM Technology Expert Labs use their deep skill and experience to architect the proper IBM Cloud Satellite solution to run your workloads where it makes sense for your users, your data and your security and compliance posture.

IBM Technology Expert Labs

Target Audience

- Solution architects who want to make the right architectural decisions for their IBM Cloud Satellite solutions.
- LoB executives who want to run workloads with the highest business value and least business risk through validated solution designs and implementation plans.
- IT operations managers who care about de-risking adopting IBM Cloud Satellite solutions that have been properly designed to meet specific functional and non-functional requirements.

Why Use This Service?

- To explore the IBM Cloud Satellite suite of services and their respective functional and non-functional capabilities.
- To confidently define the right solution using IBM Cloud Satellite and Satellite Connector to meet specific use case requirements.
- To understand the tasks, skills, resources, timeframe and cost to implement
- To become self sufficient in the designing, planning, operating and tuning of IBM Cloud Satellite and Satellite Connector.

Value Proposition

- The design and planning of any IBM Cloud Satellite solution requires sound architectural decisions to confidently define the right solution to meet your specific migration, expansion, upgrade and/or operational tuning requirements.

- Technology Expert Labs-Cloud's deep expertise, experience and best practices take the guesswork and re-work out of designing an IBM Cloud Satellite solution and defining a pragmatic implementation plan. The design and planning is the foundation for any solution, let Technology Expert Labs-Cloud reduce the risk in that foundation.

- Technology Expert Labs-Cloud can provide as little or as much expertise as you need, from a lightweight guide and enable approach to help you become self sufficient in IBM Cloud Satellite, through to turnkey low level architectural design and implementation planning.

Deliverables / Outcome

- Design and plan with confidence an IBM Cloud Satellite or Satellite Connector solution that correctly and efficiently leverages it's full features, functions and capabilities.
- Design and plan a solution with a pre-determined and budgeted timeframe and cost.
- Self sufficiency for design and planning of further use cases
- Guidance for operational hardening and tuning of IBM Cloud Satellite and Satellite Connector solutions.

Scope

- This service provides design and planning focused IBM Cloud Satellite and Satellite Connector architect, engineer and project management expertise in weekly increments.
- Duration: 1 week
- List price: $28,000 USD
- Part: D0G4EZX
